# World Class Datacenters

The logo consists of the word "CLOUD" in a bold, blue, sans-serif font, with a grey cloud shape behind it. Below it, the word "KiNG" is written in a similar blue font, with a small 'i'.

## Hosted Servers

CloudKing Connections has been providing hosting solutions for over 15 years. With experience ranging from hosting your small one or two page website through to full back-end server infrastructure for national organisations, our team are able to design, implement and maintain the perfect solution for your business.

Our hosted server solutions power the back office and point of sales infrastructure for some of Australia's largest big-box retailers. We provide these solutions through our monitored and managed data center systems to provide our clients with a robust solution that can scale and grow with their business.

Our Dell servers are housed within the Equinix and Next DC secure data centers in Brisbane with round the clock monitoring, redundant power and internet up-links. This all adds up to a secure environment with enough checks and balances to help you rest easy knowing your data is safe.

- Cloud Migration Experts
- Hosted Terminal Servers
- Dedicated Servers
- Virtual Private Servers
- Hosted Private PBX
- Custom solutions to meet client needs

**Do you have a special software, multi-site or remote access requirement? Let us design you a custom solution today!**

## Email

Look more professional on the web with an email that matches your domain and branding. Fast and secure mail hosting platforms for your business. CloudKing provides enterprise grade spam and virus filters to enable clear communication and protection for your business.

## Internet

- NBN & ADSL
- Business grade fibre solutions
- Microwave & laser technologies
- Wireless internet solutions

## Phone Systems

CloudKing provides NBN compatible hosted or onsite phone systems for many of our clients big and small. These solutions have saved our clients tens of thousands of dollars of phone costs and provided them with monitored and managed, professional PBX solutions.

Our PBX systems allow us to connect all of your locations through one central system without the massive overheads of a traditional PBX.

Using the latest equipment we can tailor a professional solution that will allow your customers to reach you with ease and can even notify you via email, who called, for those times you are unable to make it to the phone.

## Basic Web Hosting

Our basic website hosting is exactly that, your website hosted on our servers that are local and very fast. We improve your SEO results by making your website perform better.

## Managed Web Hosting

Your site lives on security hardened servers with additional layers of protection and monitoring. Round the clock monitoring and daily checks by our team of skilled security professionals means your site will be better protected against today's increased threats. We assist in providing malware cleanup services and backup restoration in the case of lost data or severe website damage.

- Daily automatic malware scans
- Hardened Security & Login Protection
- Website Firewall
- Monthly update checks
- Daily Monitoring & Cloud Backups
- Included website backup restoration

## Website Maintenance

The act of regularly checking your website for issues and mistakes and keeping it updated and relevant should be done regularly to keep your website healthy, encourage continued traffic growth, and strengthen your SEO and Google rankings.
